Message 103

Communication from the Commission - TRIS/(2024) 0104

Directive (EU) 2015/1535

Notification: 2023/0579/CZ

Forwarding of the observations of a Member State (Romania) (article 5, paragraph 2, of Directive (EU) 2015/1535). These observations do not have the effect of extending the standstill period.

MSG: 20240104.EN

4. 2023/0579/CZ - I10 - Metrology

5. article 5, paragraph 2, of Directive (EU) 2015/1535

6. Following the analysis of the project notified by the Czech Republic, we found that certain provisions contradict the international recommendation OIML R134 "Automatic instruments for weighing road vehicles in motion and measuring axle loads" and with the national regulations in Romania, which are based on this international ILOL Recommendation. The main contradiction is related to the maximum permissible errors, which in project 0111-OOP-C010-23 (in points 2.3 and 2.4) differ from those laid down in international recommendation OIML R134 (in item 2.2.1.1 for accuracy class 10 and 2.2.1.2.2 for accuracy class F).

We consider that these differences may create advantages for metrologically tested/verified measuring instruments according to the provisions of Regulation 0111-OOP-C010-23 and disadvantages for measuring instruments metrologically tested/checked in accordance with the provisions of the national legislation applicable in Romania, which is in line with the provisions of the international recommendation OIML R134.

We consider that Draft Regulation No 0111-OOP-C010-23 needs to be amended so that the provisions on the maximum permissible errors are in line with the provisions of the reference document in force, i.e. ILOL International Recommendation R134 edition 2006.
