1. In paragraph 3 of Article 98-*vicies sexies* of the Electronic Communications Code, within Legislative Decree 259 of 2003 as amended, the words ‘Consumer car radio receivers made available’ are preceded by the following text: ‘All equipment enabled with an internet connection and/or equipped with hardware devices capable of playing sound content, installed on board new category M and N vehicles and new L6e and L7e category quadricycles and made available on the market for sale or rent, must also be suitable for receiving sound broadcasting in order to allow the user to receive and play radio services provided through analogue and digital terrestrial DAB+ broadcasting. Manufacturers, assemblers, developers and importers, when placing such equipment on the market, shall ensure that it includes a functionality that allows the user to modify its configuration freely and easily, at any time, and shall also ensure the proper reception of digital radio, including when carrying out firmware and software updates.’
