5. Draft Joint Ministerial Decision laying down essential requirements for industrially processed rubber products

6. industrially processed rubber products

7. -

8. This draft technical regulation relates to products which contain industrially processed rubbers (tiles) and places restrictions on the presence of polycyclic aromatic hydrocarbons (PAHs) in compliance with the provisions of the REACH Regulation and relevant European standards (standards ELOT EN 1176, ELOT EN 1177 and ELOT 71.3).

It also lays down:

1. Essential requirements for products made entirely of rubber or which contain rubber intended to be used for the purposes specified in Annex I to the Decision. Rubber may either come from primary raw materials or secondary ones from the recycling of rubber products such as ethylene propylene diene rubber (EPDM), styrene butadiene rubber (SBR), ethylene acrylate rubber (EA, AEM), polyurethane rubber (AU, EU), silicone rubber (PMQ, PVMQ, VMQ) or others.

2. The requirements laid down and set out in Annex II ensure that these processed rubber products comply with the provisions of the relevant technical legislation and the corresponding relevant provisions on chemical compounds and mixes.

9. The fact that checks carried out in the context of market surveillance of processed rubber products (tiles) found such products not to be in conformity with the provisions of the REACH Regulation, which restricts polycyclic aromatic hydrocarbons (PAHs), or with the requirements of relevant European standards (standards ELOT EN 1176, ELOT EN 1177 and ELOT 71.3).

In addition, those products are used on floors or as floor coverings to absorb shocks (indoor and outdoor play areas, schools, surfaces in sports facilities, underlays in sports fields, etc.) and are primarily procured by public bodies via public tender procedures to meet the needs of the general public. The measures are being taken to prevent potential risks to the health and safety of children, athletes and users.

10. No basic text(s) available

11. No

12. -

13. No

14. No

15. -

16. TBT aspect

No - the draft has no significant impact on international trade.

SPS aspect

No - the draft is neither a sanitary nor phytosanitary measure.
