5. Regulation on the fire protection of buildings

6. Fire protection of buildings

7. -

8. The Regulation on the fire protection of buildings lays down the requirements and the measures to be taken in buildings.

9. The Regulation on the fire protection of buildings lays down the requirements and the measures to be taken in buildings, in order to:

- a) protect the lives and health of the persons therein, in case of fire;
- b) prevent the fire spreading from where it originally started to the rest of the building;
- c) prevent the fire spreading where it originally started to adjacent buildings and other nearby areas;
- d) protect the buildings themselves and their contents.

The main purpose of the Regulation on the fire protection of buildings remains the safety of the public in case of fire, which is generally met by the adequate design of the building and its components, the installation of active means and systems, and the right choice of materials and equipment.
