5. Order on weapons and ammunition that may be used for hunting, etc.

6. Bows and arrows, including the arrow tip

7.

8. Order on weapons and ammunition that may be used for hunting, etc. contains rules on bow hunting with bows and arrows for large deer (red deer, fallow deer and sika deer).

During the bow hunting of the mentioned species, the impact energy shall be at least 80 joules and the weight of the arrow shall be
at least 33 grams. The tip of the arrow shall be fixed, with at least three blades and a cutting diameter of 25 mm. It is prohibited to use a blunt arrow tip.

9. In the period from 2018 to 2022, there have been experiments with bow hunting on larger deer in Denmark. The experiment has been evaluated and it has been concluded that permanent bow hunting on large deer can be introduced according to the same principles that were applicable during the experimental regime.

During the experimental regime, it was chosen to use bows and arrows with the specified requirements based on an assessment of what would be sufficiently effective to bring large deer down. The evaluation of the experiment showed that it is ethically defensible to use the equipment in question to conduct bow hunting on large deer.
