Notification of Regulatory Barriers

7.

8. Part 1 of the Directive regulates the design and construction of concrete components with non-metallic reinforcement. Part 2 of the Directive regulates the requirements to be met by the non-metallic reinforcement grids, reinforcement bars and bar mats. Part 3 of the Directive provides guidance on the construction. Part 4 summarises recommendations for test procedures in the context of audit programmes. Part 5 provides guidance on the necessary evidence of the usability of the construction products.

9. The Directive lays down rules for the completion of the German safety level with regard to the planning, design, properties and construction of load-bearing structures made of concrete components with non-metallic reinforcement. The Directive provides the state of the art recognised in Germany for supporting structures made of concrete components with non-metallic reinforcement. The new material technology aims to reduce CO2 emissions in concrete construction.
