8. The Rules determine the metrological and technical requirements to be met by motor vehicle tyre-pressure gauges, the method of their marking and the conformity assessment and verification procedures to be applied:

- at gas stations, electric vehicle charging stations or other public places to ensure the technical safety of vehicles,
- in facilities for carrying out technical inspections of motor vehicles and trailers,
- in premises for performing of tyre mechanic or service activities of motor vehicles and their trailers,
- in proceedings before administrative and judicial authorities, in which the rights or obligations of entities are decided on the basis of tyre-pressure measurements.

9. Amendments to the Rules are being introduced based on the update of the Rules according to the standard SIST EN 12645, which is the basis for the new regulation, and due to the expiry of the Rules on metrological requirements for tyre-pressure gauges that may bear EEC markings and signs (Official Gazette of the Republic of Slovenia, No 74/01 and 79/15), which will cease to apply. The aim of the amendment is to harmonize the Rules to the best possible extent with the other rules in force in the EU in order to facilitate mutual recognition of type approval certificates and initial verifications.
