5. Decree of the Flemish Government authorising specific means of detection and conditions for establishing offences and infringements as mentioned in the Shipping Decree of 21 January 2022, and the regulations implementing the aforementioned Decree

6. Specific means of detection and conditions for establishing offences and infringements as mentioned in the Shipping Decree

7.

8. The purpose of the present Decree is to implement Article 114 of the Shipping Decree and thus to allow specific means of detection for establishing offences and infringements falling within the scope of the matters governed by the Shipping Decree.

The draft Decree first identifies the technologies that can be used by such means of detection. In addition, the conditions under which such means of detection can be used are also laid down. Finally, for certain technologies, the second paragraph of Article 114 is also explicitly implemented, which provides that automatic devices, insofar as they carry out measurements, are approved or validated in accordance with the modalities laid down by the Flemish Government.

9. These technical requirements are necessary to ensure safety on and along waterways. Our focus is on the biggest risks, which prevent a liveable and safe situation on and along navigable waterways. The technical requirements ensure that the means of detection can be used efficiently and, with regard to citizens, they guarantee that they operate correctly. The rules aim at an innovative and automated way of enforcement, which has an impact on different components in the enforcement process.
