5. Draft regulation on the modification of the structure of a car and its trailer.

6. Vehicles of categories M, N and O

7.

8. The regulation would amend the existing regulation on the modification of the structure of a car and its trailer (TRAFICOM/194495/03.04.03.00/2019) and add the changes made to section 6.3 on the modification of a car to be ethanol-powered by a separate regulation (TRAFICOM/534395/03.04.03.00/2022).

9. The regulation concerning the modification of the structure of a car and its trailer needs to take account of certain modifications which, under certain conditions, may be approved in the course of a modification inspection without an exemption. These include the installation of building maintenance equipment and road maintenance equipment, as well as changes to the bodywork of vehicles.

It is also necessary to take into account the new requirements for cars and their trailers, in particular those resulting from the new EU safety regulation (EU) 2019/2144 and its implementing regulation (EU) 2021/5352. Requirements related to these EU regulations, such as the protection of the vehicle against cyberattacks, software updates, and prohibited and permitted changes related to the tyre pressure monitoring system, need to be laid down in the regulation on structural modifications.
