**Notification of Regulatory Barriers**

6. 10 unique new psychoactive substances (hexahydrocannabinol, acetyl-hexahydrocannabinol, hexahydrocannabiphorol, 4en-PDMB-4en-PINACA, ADB-111, FUBIAT, fluorexetamine, rilmazafone, 5-MeO-TMT, 4F-MBZP) which may be abused

7.

8. The 10 unique new psychoactive substances (hexahydrocannabinol, acetyl-hexahydrocannabinol, hexahydrocannabiphorol, 4en-PDMB-4en-PINACA, ADB-111, FUBIAT, fluorexetamine, rilmazafone, 5-MeO-TMT, 4F-MBZP), which are to be added to the List in Annex 3 of the Decree, shall not be freely marketed in Hungary, and any activity carried out involving their use shall be subject to registration by the authorities. Due to the above, health risks will be reduced, as it will be made more difficult for substance users to gain access to these substances.

9. In Act XCV of 2005 on medicinal products for human use and on the amendment of other regulations related to medicinal products (hereinafter referred to as 'Medicines Act'), Section 15/B(1) stipulates that a substance or group of compounds may be classified as a new psychoactive substance after prior professional evaluation.

Pursuant to Section 15/B(3) of the Medicines Act, such preliminary professional evaluation should verify that, concerning the given substance or group of compounds, the Hungarian authorities and expert institutions are not aware of any information

(a) that would indicate the pharmaceutical use of the substance or the group of compounds, and

(b) which rules out the possibility that that substance or group of compounds poses a similar threat to public health than that attributed to drugs or the substances mentioned in List 1 and 2 of the Psychotropic Substances in Annex 2 of the Decree of the Minister for Health on controlled substances.

Pursuant to Section 27(4a) of Government Decree No 66/2012 of 2 April 2012 on licensed activities with narcotics and psychotropic substances, as well as new psychotropic substances, including the listing and amendment of the listing of these substances (hereinafter: 'the Government Decree'), the new task of the National Drug Focal Point is to monitor the list of suspected new psychoactive substances in foreign circulation on a monthly basis within the framework of information exchange. In this context, 9 new substances were found that are included in the European Early Warning System (EMCDDA Early Warning System) but are not subject to control in Hungary. In addition, 1 new substance has been identified on the domestic market.

In accordance with Section 27(4)(c) and (4a) of the Government Decree, the National Drug Focal Point contacted the National Institute of Pharmacy and Nutrition (OGYÉI) and the National Food Chain Safety Office (NÉBIH) in connection with the above-mentioned 10 substances in order to verify whether the conditions specified in The provisions of Section 15/B(3) of the Medicines Act are met. Based on the responses of OGYÉI and NÉBIH as well as its own further investigation, the National Drug Focal Point concluded that these substances are suspected of being abused and black marketed, which justifies their classification as new psychoactive substances.

Accordingly, 10 unique new psychoactive substances are added to the List in Annex 3 of the Decree.

10. Reference(s) to basic text(s):

B-2023-0339-HU-01

11. Yes

12. The notification of the changes in the List of Annex 3 to the Decree (the addition of 10 unique new psychoactive substances) as a matter of urgency is justified both on grounds of public health and public safety. Further explanation can be found in the attached file.
