

Pursuant to Article 17(2) of the Construction Act [Narodne Novine (Official Gazette of the Republic of Croatia) Nos 153/13, 20/17, 39/19 and 125/19], the Minister for Construction and Spatial Planning adopts the following

## **TECHNICAL REGULATION AMENDING THE TECHNICAL REGULATION ON CONSTRUCTION PRODUCTS**

### Article 1

The List of non-harmonised standards provided in Annex I to the Technical Regulation on Construction Products [Narodne Novine (Official Gazette of the Republic of Croatia) Nos 35/18 and 104/19] shall be replaced with a new List of non-harmonised standards provided in Annex I to this Technical Regulation, which constitutes an integral part thereof.

### TRANSITIONAL AND FINAL PROVISIONS

#### *Commenced construction of buildings*

### Article 2

(1) A construction product referred to in this Technical Regulation may be installed in a structure erected pursuant to the building permit that contains the main design prepared under the previously dated standards of the same reference marks, if its performance is adequate or more favourable, in cases where this is specified by the main or detailed design and the detailed design establishes that the product can be used in that structure, including the conditions of its installation and environmental factors.

(2) For the purposes of the implementation of the provision referred to in (1) of this Article for the part of a structure erected prior to the installation of the construction products specified in compliance with the previously dated standards of the same reference marks, the performed works must be in compliance with the special regulation which governs the implementation of expert supervision over the construction, format, conditions and method of keeping the construction log book, and the content of the final report of the supervising engineer.

(3) For the installation of construction products specified in compliance with this Technical Regulation, the main or detailed design referred to in (1) of this Article shall include a detailed quality control and assurance programme, elaborated pursuant to the Technical Regulation on Construction Products [Narodne Novine (Official Gazette of the Republic of Croatia) Nos 35/18 and 104/19].

#### *Issued decisions*

### Article 3

(1) Certificates issued by approved bodies for a laboratory, for a laboratory for the assessment and verification of consistent performance of construction products in relation to

their essential characteristics: reactions to fire, fire resistance, properties during external fire, acoustic properties and emission of hazardous substances, for the body that performs certification for factory manufacturing control, and for the product certification body, issued pursuant to previously dated standards of the same reference marks referred to in the Technical Regulation on Construction Products (NN Nos 35/18 and 104/19), which are now standards with more recent issue dates according to this Technical Regulation, shall be valid until 31 December 2029, unless the changes to the standards are such that they influence the assessment and verification of constant performance of construction products and/or issuance of the certificate in terms of compliance with the basic requirements for construction works, on which the approved body has carried out an assessment and has provided a written declaration in accordance with the specific regulation on bodies, documentation and procedures of the construction products market.

(2) Certificates issued by approved bodies for a laboratory, for a laboratory for the assessment and verification of consistent performance of construction products in relation to their essential characteristics: reactions to fire, fire resistance, properties during external fire, acoustic properties and emission of hazardous substances, for the body that performs certification for factory manufacturing control, and for the product certification body, issued pursuant to previously dated standards of the same reference marks referred to in the Technical Regulation on Construction Products (NN Nos 35/18 and 104/19), which are now standards with more recent issue dates according to this Technical Regulation, shall be valid until 31 December 2027, unless the changes to the standards are such that they influence the assessment and verification of constant performance of construction products and/or issuance of the certificate in terms of compliance with the basic requirements for construction works, on which the approved body has carried out an assessment and has provided a written declaration in accordance with the specific regulation on bodies, documentation and procedures of the construction products market.

*Certificates and declarations of performance issued under previously dated standards*

Article 4

(1) Certificates on the consistent performance of products, certificates of conformity of the factory manufacture control, test reports and declarations of performance issued in compliance with previously dated standards of the same reference marks referred to in the Technical Regulation on Construction Products (NN Nos 35/18 and 104/19), which are now standards with more recent issue dates according to this Technical Regulation, shall be valid until 31 December 2029 for market purposes and for installation in construction products.

(2) Procedures for the assessment and verification of consistent performance of construction products in accordance with previously dated standards of the same reference marks referred to in the Technical Regulation on Construction Products (NN Nos 35/18 and 104/19), which are now standards with more recent issue dates according to this Technical Regulation, may be implemented until 31 December 2027.

(3) For construction products for which the assessment and verification of constant performance have been carried out in accordance with (2) of this Article, a declaration of performance may be drawn up until 31 December 2028.

(4) Construction products for which a declaration of performance has been drawn up by 31 December 2028 in accordance with (3) of this Article may be placed on the market and be installed in construction structures until 31 December 2029.

*Properties and essential characteristics of construction products specified pursuant to previously dated standards*

#### Article 5

(1) The main design of a structure may specify properties and essential characteristics of construction products according to previously dated standards of the same reference marks contained in the Technical Regulation on Construction Products (NN Nos 35/18 and 104/19), which are now standards with more recent issue dates according to this Technical Regulation, until 31 December 2026.

(2) The main design referred to in (1) of this Article shall be deemed a valid document for issuing the act on the basis of which construction is authorised, if the request for the issuance of the act and the main design were submitted by 31 December 2027.

#### Article 6

This Technical Regulation has been notified in accordance with Directive (EU) 2015/1535 of the European Parliament and of the Council of 9 September 2015 laying down a procedure for the provision of information in the field of technical regulations and of rules on Information Society services (codification) (Text with EEA relevance) (OJ L 241, 17. 9. 2015).

#### Article 7

This Technical Regulation shall enter into force on the eighth day following its publication in the Official Gazette of the Republic of Croatia.

CLASS: 360-01/24-01/21
