6. With reference to communication TRIS/ (2024) of 4 March 2024, concerning the European Commission's final assessments of the draft technical regulation notified by Italy, and taking note of the information also communicated by the Commission by email of 8 May and 27 May, please find below the following replies, illustrative of the changes made and their improving effects to the notified draft which took place during the course of the legislative procedure.

The European Commission stated in the above-mentioned Communication that "the provision on thresholds for direct investment in the production of European works [which] will be amended in order to raise the threshold from 50 to 60 % [...] constitutes a substantial change falling within the scope of Article 5(1), third paragraph, of the SMTD: "Member States shall communicate the draft technical regulation again to the Commission under the conditions set out in the first and second subparagraphs of this paragraph if they make changes to the draft that have the effect of significantly altering its scope, shortening the timetable originally envisaged for implementation, adding specifications or requirements, or making the latter more restrictive".

In this regard, it should be firstly noted that, in order to overcome and comply with all the requests set out in the above-mentioned TRIS communication, Italy has made significant corrections to the draft technical regulation already notified, in line with the comments received from the European Commission after previous discussions and with a view to greater certainty and a significant reduction in investment obligations for operators in the sector.

The draft, which is attached, was approved in the final text by the Council of Ministers on 20 March 2024, published in the Official Journal on 17 April 2024 and has been in force since 2 May 2024.

In particular, with reference to the provisions concerning European and independent audiovisual production, it is hereby informed that, in light of the European Commission's request and communication, the Italian Authority, in developing the final text of the draft technical regulation, has reduced the share of investment obligations in European works, as referred to in Article 55(2)(b) of Legislative Decree No 208/2021, from 20 % to 16 %, namely a decrease of four

EUROPEAN COMMISSION

Directorate-General for Internal Market, Industry, Entrepreneurship and SMEs

percentage points in total (corresponding to a 20 % reduction in the share of net turnover that non-linear operators are required to invest in European works).

In addition to this significant quantitative reduction in the share of investment obligations in European works, including the share of investment in original Italian works, there is also a guarantee of greater certainty for non-linear operators, achieved by removing the possibility of increasing, through the regulatory source, both the percentages of the various sub-quotas provided for by TUSMAV as well as the possibility of introducing other types of sub-quotas (see amendment to Article 53(2) of Legislative Decree No 208/2021).

Therefore, in this overall context, the Italian legislator has adjusted, within the scope of the above-mentioned reduction, the relationship between the investment obligations in European works and the sub-quota allocated to Italian original works. The latter, in the most recently approved text (see amendment to Article 55(8) of Legislative Decree No 208/2021) records an increase from 10 % (corresponding to 50 % of turnover in European works) to 11.2 % (corresponding to 70 % of net turnover in European works, as currently reduced to 16 % compared to the previous 20 % forecast) out of total investment obligations.

The minimum increase in the sub-quota of Italian original expression works (1.2 %) is therefore more than offset by the significant reduction in investment obligations in European works (4 % of the total investment compared to the previous forecast).

In addition, further simplification provisions were added, as already described in the previous notification of the draft technical regulation, such as the removal of the regulatory source to regulate the contractual arrangements for the fulfilment of planning and investment obligations (see amendment to Article 57 of Legislative Decree No 208/2021). In short, in accordance with the European Commission's request, and in line with the objectives set out in Directive 2015/1535 to facilitate the participation and monitoring of the sectoral legislation by all operators, it can be considered that the most recently approved text strikes a balance between the interests involved, reducing the burden on operators, as requested by them, while at the same time meeting the producers' demands for greater emphasis on the dissemination of national values and artistic expression through the Italian audiovisual work.

These provisions of the draft, as last amended, do not alter the scope of sectoral legislation, but rather lessen the specifications and requirements for investors under the domestic regulations. For this reason, it did not seem necessary to send a new notification of the draft technical regulation to the Commission, as Italy thus largely transposed the information set out in the detailed opinion.

It is also hereby pointed out that Italy has complied with the information provided by the European Commission in its note of 4 March 2024 concerning the risk of overlapping Article 4(1) of Legislative Decree No 207/2021 with Article 19 of Regulation (EU) 2022/2065. To this end, the reference to platform services for sharing audiovisual content or even audio-only content, which are subject to the scope of the DSA, has been deleted and the application of the national provision is limited to audiovisual media and radio broadcasting services only. (see Article 1(4)(a) of Legislative Decree No 50/2024).

Finally, in response to the latest communication received from the European Commission, it is hereby confirmed what has already been stated in the reply to the detailed opinion (see note of 19 January 2024) concerning the following points:

- paragraph 12 of article 41 of Legislative Decree No 207/2021 has been deleted, also concerning the relevant obligations on video-sharing platforms, with a view to full harmonisation with the country of origin principle laid down in Article 28a of the SMAV directive; (see Article 1(29) of Legislative Decree No 50/2024)
- articles 14 to 17 of Legislative Decree No 70 of 9 April 2003, implementing Directive 2000/31/EC on certain legal aspects of information society services, in particular electronic commerce, in the Internal Market as suggested by the European Commission, have been repealed; (see Article 3(4) of Legislative Decree No 50/2024)
- finally, certain provisions have been removed which, as the Commission pointed out, could create legal uncertainty or incompatibility with the principle of direct applicability of the DSA, and in particular the following: 'Articles 6 and 8 of the EU Digital Services Act 2022/2065 shall apply to video-sharing platform providers established in Italy pursuant to the previous paragraphs' and 'Without prejudice to Articles 4, 5, 6 and 8 of Regulation (EU) 2022/2065', wherever they appear in the text, Articles 41 and 42 of Legislative Decree No 207/2021, as well as the closing provisions laid down in Article 67(13) and Article 71(5a) of the draft legislative decree, which established the primacy, in the event of conflict between the national provisions of penalties and those of the DSA, of the provisions governed by Regulation (EU) 2022/20. (see Article 1(29), (30), (39) and (41) of Legislative Decree No 50/2024).

Finally, it should be recalled that Italian law, in order to promote film and audiovisual production, the enhancement of the circuit of cinemas and the digitisation of film heritage recognises, by Law No 220 of 14 November 2016, a tax incentive in the form of a tax credit, which is in favour of companies investing in film and audiovisual production for the development and production of films and television works.

Specifically, the film and audiovisual 'Tax credit for production enterprises', governed by Article 15 of Law No 220/2016 and subject to recognition of the cultural eligibility of the work, is disbursed at the request of the producer in an amount of no less than 15 % and no more than 40 % of the cost of the works, and allows beneficiaries to use the credit on the basis of the expenses incurred by offsetting the taxes due against the accrued credit.

Thus, those who invest, by producing quality works, can also get compensation for tax and social security debts, which is calculated automatically on the basis of the expenses incurred for the development, production as well as national and international distribution of films, TV works and web works. In those circumstances, the investment obligations imposed on audiovisual media service providers under Italian jurisdiction (especially those on demand referred to in Article 55 of Legislative Decree No 207 of 2021, as amended by Legislative Decree No 50 of 2024), in accordance with the system of quotas (in European works and original works in Italian) described above, must be taken into account in the light of the possibility of claiming such benefits, which act as compensation for the investments themselves, thereby reducing, in fact, the burden laid down in the provision in question, which must necessarily be read in conjunction with the provisions of Article 15 of Law No 220/2016.

Finally, considering that, in the light of the above, we have complied with the requests made by the Commission in its detailed opinion of 21 December 2023 and the subsequent interlocutory note of 4 March 2024, and in reply to the email of 8 May, we remain at your disposal for whatever further needs may arise.

Legislative Decree No 50 of 25/03/2024.

The Authority shall also establish the supervisory procedure for monitoring and periodic assessment of compliance, in accordance with the principles of transparency, non-discrimination, and proportionality.

6. For the purposes of protecting minors referred to in paragraph 1(a), the most harmful content shall be subject to the strictest access control measures.

7. Video-sharing platform providers shall in any case be required to:
