6. Notification 2025/330/FI - Draft Government proposal to Parliament for legislation supplementing the EU Batteries Regulation and implementing the amendment to the Waste Electrical and Electronic Equipment Directive

Within the framework of the notification procedure laid down by Directive (EU) 2015/1535, the Finnish authorities notified to the Commission on 27 June 2025 the draft 'Government proposal to Parliament for legislation supplementing the EU Batteries Regulation and implementing the amendment to the Waste Electrical and Electronic Equipment Directive' (hereinafter, 'the notified draft').

According to the notification message 'the notified draft aims to add provisions supplementing the EU Regulation on batteries and accumulators and waste batteries and accumulators to national legislation'.

In order to allow the Commission services to complete their analysis under the relevant provisions of EU law, the Finnish authorities are kindly invited to reply to the following request for supplementary information:

The Finnish authorities reported in the explanatory note accompanying the notified draft that '[i]t has not been possible to include in the proposed section or its explanatory memorandum a specification of which authority would supervise the publication of the producer responsibility registration number on an online platform under Article 30(7) of the Digital Services Act, as the applicability of that provision is subject to interpretation under the Battery Regulation.' The Commission services would like to better understand the reason for the reference to Article 30(7) of Regulation (EU) 2022/2065 (the Digital Services Act [1]) within the context of the notified draft and the relation to Regulation 2023/1542 (the Batteries Regulation [2]). Furthermore, the Commission services would like to understand whether this would affect the competences attributed to the Finnish Transport and Communications Agency by the national law designating and empowering that Agency as Digital Services Coordinator under the Digital Services Act.

Could the Finnish authorities also explain the rationale behind Article 25 of the notified draft, in particular the implications

of excluding Chapter 3 of the Act on the Supervision of Network Intermediary Services (18/2024) from the competences attributed to the Finnish Transport and Communications Agency in relation to the application of the notified draft?
