5.

6. Animal welfare is an important priority for the Commission. Standards and rules interpreting the current EU transport Regulation in a way that varies across Member States create unlevel playing field between EU operators and an unsmooth functioning of the internal market. Both EU and MS rules applicable to animal welfare need to address modern realities, the latest scientific advice, societal demands, and ensure an effective single market. Therefore, we will monitor developments in this field closely, and encourage NL to look for EU level solutions to this issue of temperature during transport.
